

**Revised September 03, 2023**

**CAN-AM NET ON-AIR PREAMBLE**

Good morning all! Welcome to the Canadian American Net / CANAM Net for short!

I am your NCS for today, my callsign is **XXXXX**, and my name is **XXXXX**.

My QTH is **XXXXXXXX** , approximately # of miles near landmark.

There is a different NCS every day of the week. This a controlled net.

The CAN/AM Net meets 7 days a week at 9:15 AM Eastern time on this frequency, 7.153 MHz using both SSB and CW modes and CW is optional.

Once NCS starts final wrap-ups, usually around 10:15 AM, any check-ins after wrap ups begin will forego their wrap ups due to time constraints.

We encourage everyone to download NetLogger (NetLogger.org), so you can see who has checked in and follow along with the net, as well as, use the AIM (Almost Instant Messenger) to facilitate off-the-air communications with others that are on the Net.

We have a website CANAMNET7153.com, please email our Net Manager, Dick / K2KA with any ideas or suggestions. If you would like to be added to our net roster and either do not have an email or do not wish to put your email on the net you can email K2KA directly, his email is on the CANAM website.

**I WILL NOW ASK FOR STATIONS THAT ARE SHORT TIME, PORTABLE, OR MOBILE, PLEASE COME WITH YOUR CALLSIGNS.**

**CLOSING THE NET:**

Thank you to everyone that checked in today, tomorrow please check in when your NCS will be ?????

This frequency is now returned to regular amateur use, 73!
